

ABSTRACT**METHODS AND DEVICES FOR CLEANING
SOILED FABRICS**

5 The present invention is directed to devices and methods
of use thereof for cleaning fabric, cloth or apparel. More
particularly, the present invention relates to methods of
cleaning using small portable devices for cleaning that dissolve,
10 dissociate or digest stains from fabric or cloth. The devices
comprise at least one chamber. The cleaning solution flows
through the fabric and removes the stain or soiling material.
